About this Map: "Transportation Connections" and its related traveler information "Kiosk Project" are products of a collaboration between the North Sound Connecting Communities Project and the Whatcom Council of Governments. These efforts are supported by U.S. Department of Transportation funding as well as by local governments and transportation agencies. For more information please visit www.wcog.org. Comments are welcome. For information about transportation providers please use the contact information listed for specific providers. This map is not intended to be an exhaustive inventory of transportation services in the region represented, nor is it intended as a road map or navigational guide. It illustrates the major services and routes available and includes a few examples of the many local transit routes serving this region. This map is not intended to replace detailed information and route maps for these services which can be obtained, along with schedule and fare information, at the web addresses and telephone numbers listed. Information depicted on this map for services in British Columbia may be less detailed than for services in Washington State. Detailed information about local service providers, including taxicabs, car and bicycle rentals, etc., is best obtained at the local transportation hub or through telephone directories and internet web searches. The concept behind this map was inspired by Robert Whitbeck and Milton Clift, longtime riders and champions of public transit.
